

# VT AJ Bell Balanced Q2 2022 Report

## Commentary

Following the Russian invasion of Ukraine and the western sanctions placed on the former, supply chains continued to be strained in Q2. This prolonged a problem first seen in the aftermath of COVID-19, when sourcing goods from around the world became more difficult than historically. This is at least some of the reason why we're seeing higher inflation than we're used to. In a higher inflation world, we would probably see greater reluctance to support the markets from central banks. For capital markets, the effect has been weakness and volatility in both equity and bond markets. During the quarter both broadly fell, with particularly poor performance in more expensive parts of the equity market and higher risk parts of the bond market. During the quarter, the fund returned -4.04%, and is now down -1.03% over the last twelve months. While disappointing in an absolute sense, both figures represent considerable outperformance against the IA Mixed Investment 20-60% Shares sector, demonstrating the difficult conditions of investment markets this year.
